

Sacred Galactic Scripture Jatakas: Starseeds Guide to Earth

Sacred Galactic Scripture : Jatakas is a continuation of the discussion, broken down. Sacred Galactic Scripture : Starseeds Guide to Earth, Elizabeth Trutwin's first book, which contemplates Supreme Love, The Highest Consciousness and human existence from the standpoint of Ascension. From her blog on GalacticRoundTable.com to her radio program on BBSRadio.com she repeatedly asks us to give up the tired old fear-based provocations and invites us to review aeons of cosmic and terrestrial history. She reminds us there is an entire Multiverse of UFO Civilizations on Sister Stars happening simultaneously to our existence here. The book's most provocative views into our Galactic Heritage envision the Origin of the Universe and the fall from Grace and then, more concisely and less literally, the end of time, when all the fallen Angels are removed from our Universe and we are finally free to expand to the Highest Consciousness. In her view, exposing ourselves to Scripture from Islam, Judaism, Hinduism, Christianity, Taoism, Buddhism and Gnosticism help to see the universal fall from Grace is not a singular event in history but rather an axiom of human experience, repeated in every generation and in the consciousness of every individual. The miraculous paradox is that this universal pattern repeats itself in circumstances that are always unique. And so this Galactic coming-of-age story, quietly astute in its assessment of the Unity in all Faiths helps us answer the quintessential questions: Who Am I? Where Do I Come From? Why Am I Here? Within the Scripture lies the creation of the universe, which arrives (no matter how many times you have read about it) as something of a surprise. How did we get here? Trutwin explains that we fell as a result of nuclear holocaust in the Aurora 23 Solar System leading to the destruction of Niburu the Twelfth Planet,

and the resultant literal fall into lower dimensions of Our Sun, Sol, Mercury, Venus, Earth, Jupiter, Saturn, Uranus, Neptune, Pluto and Nibiru. But that explanation will only make sense when StarShips land, once again on Earth. In a lovely, surrealist touch, she shows us this story passed down in all the major cultures of the world. Not only that, she shows quotes from world religious teachers through the ages which all say the same thing: We fell from an Anti Matter Universe to the Matter Universe, known as Nebadon. There are very few books that convey the changing culture of Earth with such fidelity and sensitivity. Nor are there many that penetrate so deeply into the currents of feeling that bind all members of our Galactic family. So much is conveyed about the tension and tenderness within those working on Ascension and the frustrations that invade our happiness, like global war and mass starvation. Sacred Galactic Scripture : Starseeds Guide to Earth outlines a well-traveled territory while excavating primal, eternal meanings which show us our inherent Path to Enlightenment.
