

Where Do Broken Hearts Go?

After giving her all to the man she thought she would be with forever, Gabrielle struggled trying to figure out where broken hearts go. Moving on from a man that had hurt her more than anything was hard, but necessary. It's what she needed to allow her heart time to mend. Deciding to trust love again, she met her husband, Lance. He's a man with eyes for only his wife, even though he's dealing with his own demons. He's fighting against vengeful thoughts of the past, while trying to build a bright future for him and his wife. As both pray that what they have is strong enough to survive, hurtful people from their pasts begin to resurface, causing emotions to run high. This unhealthy strain on their relationship forces both to reevaluate things, especially their hearts. Will Gabrielle stand behind the man that has given her nothing but love, or will she realize that her broken heart never truly mended and turn back? Will she endure another broken heart? Will Lance allow anger from the past to corrupt the man he has tried to be for Gabrielle? Can he truly let vengeance go, or will he allow it to lead him away from the woman he loves? Who will truly end up trying to figure out the answer to the main question: Where Do Broken Hearts Go?
